

# INDEX

## Volumes 1-54

### 1966 - 2019

This is an index of articles which have appeared in **The Vintage Ford**. It covers the 54 volumes of the magazine beginning in March 1966 through the November-December 2019 issue. National news, chapter news, tours, Life in the Slow Lane, and similar articles are not included in order to conserve space.

The numbers which appear after each heading indicate the Volume, Issue, and Page number(s). For instance, 18-5-11 would mean Volume 18, Issue Number 5, Page 11; 20-1-4 would mean Volume 20, Issue Number 1, Page 4. The Volume indicates a specific year; the Issue number is the Issue within that year. Volume 1 is 1966, Volume 36 is 2001. There have been six issues every year except for 1966, in which there were only five.

In 2001, the Model T Ford Club of America produced a seven-CD set of all the magazines produced from 1966 through 2000. The CD set includes every page of every issue and includes an index like the one shown here. Merely clicking on the article of interest will take you directly to the article or it will tell you which CD to insert to find it. As each issue has been scanned using optical character recognition (OCR) software, it is possible to do a word search in each issue. It is available for purchase for \$119.99; contact the MTFCA Business Office to order the CD set. Plans are underway to have years 2001 through 2017 available soon.

Because the various models of the Model T Ford have been covered in great detail over the years, seemingly duplicate articles of any given year are indicated in the Index. In general, the latest article is the most accurate (we learn as we go) and is the one to review, but often there is a photo or information in an earlier article that might be of value during restoration. Where there are conflicting statements, the latest article is probably the most accurate.

Where shown, "TT" indicates the article is a part of our regular feature, *Tinkerin Tips*; "LQA" indicates this was in *Letters, Questions & Answers*.

While we have taken every effort to ensure that the information in this Index is accurate, we are not perfect. If you find an error, please notify our editor in order that it can be corrected.
